Good friend token. Welcome to \$YOSI

YOI SHIBA INU Mem. Big big dream. With the power and support of the community, it aims to travel to the moon and take its place on the moon.

YOI SHIBA INU was founded in OCTOBER 2021 with the goal of being a decentralized meme project with a real purpose to create the first startup exchange for emerging tokens to grow rapidly and for previously released tokens to create an exchange where they can grow safely.

YOI SHIBA INU mission is to bring popular cryptocurrency concepts to the mainstream. Unlike older, comparable projects, YOI SHIBA INU gives owners 4% ownership rewards as participation and will manual burn 35% of the total supply, introducing next generation concepts such as decentralized exchanges and more In the first months of its launch, YOI SHIBA INU aims to achieve its goals.

\$YOSI TOKEN

\$YOSI, is a deflationary token that takes a 15% tax from each buy and sell. This tax acts to benefit the project as a whole by putting 4% in the auto burn for a stable price floor, 4% proportionally reflected back to reward all holders of a YOSI token and 7% added to a marketing/dev wallet to make sure that the project is able to succeed in the long term.

Another large purpose of the tax is to incentivise large token holders from buying and selling quickly and damaging the price. This almost always effects the small token holders and we want a fair coin for all.
